

Ultrasound Student Assessment (USA)

The Ultrasound Student Assessment (USA) is an examination of intrinsic skills that are essential for the sonography profession. It is administered by Pegasus Lectures through a remote proctoring environment. The USA exam was created to specifically test examinees for: coordination, persistence, problem solving, spatial ability, judgment, graph interpretation, visualization, and logic. Study tools and practice exams are not available. Please visit the [Pegasus website](#) for additional information. The BSC DMS Program will use the physics and clinical score categories to apply points towards the program application.

Instructions:

- Applicants must call Pegasus Lectures at 972-564-3056 (Monday – Friday, 9 am – 5 pm CST) to schedule a time to take the assessment in a remote proctoring environment and make payment in the amount of \$65 (includes proctoring fee) for their test. Visa/MC/AMEX or Discover are acceptable forms of payment. Testing times are Monday – Friday, 9 am – 3 pm CST.
- Once the appointment and payment have been made, the applicant will receive an email from Pegasus Lectures confirming the appointment time.
- On the testing day, the applicant will receive an email prior to the testing time with a link for the proctor to connect to your computer. Make sure to follow the instructions in the email.
- The USA must be completed in one sitting. There is no time limit. Testing time is generally 1.5-2 hours.
- Close all other programs prior to starting the USA.
- Enter the following information for the instructor:
 - Instructor’s Name: Adrienne Lowe
 - Email: adrienne.lowe@bismarckstate.edu
 - Select: Student
- When the USA asks if you are right-handed or left-handed, you can select your dominant hand **or** the hand that you use to operate a computer mouse.
- If you do not know your GPA, maximum GPA possible, rank in college, or how many students were in your class, click “enter” and N/A will be entered on the line(s).
- Applicants may take the test only once **prior to submitting the sonography program application.**
- A recorded chat box with the exam proctor will be available during testing. If you have questions during the exam, be sure to ask for assistance. The proctor may or may not be able to answer your question depending on the nature of it. Do not continue with the test if significant technical difficulties arise.
 - If you have any technical questions, please contact techsupport@pegasuslectures.com.
- Applicants will not receive their scores upon completion of the USA. See FAQs below for additional information.

Technical Requirements:

- You will be downloading USA to your computer to take the exam. **The USA will not work on a Mac, Chromebook, tablet or phone.**
- The applicant must have the following prior to starting the USA:
 - Windows operating system on their computer
 - A standard-size, free-moving mouse is required
 - A mouse pad is strongly suggested
 - A physical keyboard (touchscreens will not work for the exam)
 - A flat surface and clutter free area
 - Computer display settings at no more than 100%
- Please contact the DMS Program Director as soon as possible if you are unable to meet one or more of these testing environment requirements.

Scoring System:

The BSC DMS Program uses the physics and clinical categories to award points on each applicant's ranking worksheet. These points are then added together as your overall USA score. The physics category involves evaluation of spatial resolution, graph interpretation, logic, and problem solving. The clinical category involves evaluation of judgment, visualization, persistence and dexterity/hand-eye coordination. The USA is not a pass/fail exam and does not use a 0-100 point scale like other standard exams. An average score in any category is zero (0).

Weighted Score	Points Awarded in Physics Category	Points Awarded in Clinical Category
≤ 0.0	0	0
0.1 – 3.5	4	4
3.6 – 7.0	8	8
7.1 – 9.9	12	12
≥ 10	16	16

Prior TEAS Evaluation:

Students who successfully completed the Test of Essential Academic Skills (TEAS) with scores ≥ 62 in **Math** and ≥ 73 in **Reading** in 2022 will not be required to take the Ultrasound Student Assessment (USA) for the 2023 DMS application window. TEAS examination results will not be valid for the 2024 DMS application process and all applicants will be required to complete the USA. Please contact the BSC DMS Program for any additional clarification.

Ultrasound Student Assessment (USA) FAQ's

Why is the Ultrasound Student Assessment (USA) being used?

- The Diagnostic Medical Sonography program is highly selective. The USA is being utilized to test specific skills required to learn and perform ultrasound clinical studies.

When should I take the USA?

- Students must register for and take the TEAS test no less than 5 days prior to the application deadline. Tests taken after the application deadline will not be used for the current admissions cycle. Exceptions may be made on a case-by-case basis by the DMS Program.

How long does the test take?

- There is **no time limit**. The USA must be completed in one sitting. Testing time is generally 1.5-2 hours.

How much does the test cost?

- Students are required to call Pegasus Lectures at 972-564-3056 to schedule a time and make payment via Visa/MC/AMEX or Discover for their test. The cost is \$65.00 (including proctoring fee) effective May 1, 2022. All costs are subject to change without notice.

I want to study first. Is there a study guide?

- The USA program is a true aptitude test and as such, there is not studying possible. This program tests innate abilities such as visualization and hand-eye coordination which impact the ability of an individual to master essential skills required to perform sonography. The USA is not a pass/fail exam and does not use a 0 – 100 point scale like other standard exams. An average score in any category is zero (0). There are some areas for which students may see a negative value in the raw cut score. This does not mean failure; it only identifies weaker areas in a particular quality.

Where do I find my scores?

- Applicants will not receive their scores upon completion of the USA. Scores will be uploaded to the BSC DMS Program account. Please do not contact Pegasus Lectures for scores. To request a review of your score for this assessment, you must email the BSC DMS Program.

What is a passing score?

- The USA is not a pass/fail exam.

Can I retake the USA?

- Applicants may take the USA only once per application cycle. It must be completed prior to submitting the DMS Program application. Students are encouraged to concentrate, analyze and carefully select their answer choices. The USA may be taken twice by any DMS program applicant, and only once per application cycle.

How long are Ultrasound Student Assessment (USA) scores valid?

- Ultrasound Student Assessment (USA) scores do not expire. If a student is not accepted to the program as a first-time applicant, they may choose to retake the assessment for the following year as a re-applicant. The USA may only be taken twice by any Sonography program applicant, and only once per application cycle. Please notify the Diagnostic Medical Sonography Program Director if you decide to retake the assessment as a re-applicant.
